EDITORIAL

As a pioneer of climate finance since 2010, and a leader in Green Bonds, Crédit Agricole adopted in 2019, a Climate Strategy aligned with the Paris Agreement, placing green finance at the heart of its economic development. Based on scientific International Energy Agency (“IEA”) recommendations, this strategy, a growth driver for the Crédit Agricole Group, is applied across all of its business lines.

The three objectives of this strategy are to enable the gradual reallocation of the loan, investment and asset under management portfolios, to develop impact investments and to integrate the climate issue into the client relations. In line with this strategy, the Group’s business lines joined in 2021 and 2022 the Glasgow Financial Alliance for “Net Zero 2050”, including the Net Zero Banking Alliance, Net Zero Asset Managers Initiative and the Net Zero Asset Owner Alliance. Despite the significant changes brought about by these alliances, Crédit Agricole reaffirms its full commitment to promoting the energy transition and actively supporting all collective initiatives aimed at developing shared frameworks and methodological standards, for example with UNEP FI¹, in order to encourage transparency and consistency across the entire financial sector. In a context of climate emergency, Crédit Agricole launched in December 2021 its Societal Project, i.e. a 10-societal commitment programme aimed at strengthening the social and environmental impact of its business model by 2025. This programme is structured around three areas: acting for climate and the transition to a low-carbon economy, strengthening cohesion and social inclusion, and making a success of the agricultural and agri-food transitions. The climate dimension of this programme targets to reach loan and investment portfolios carbon neutrality by 2050, thereby contributing to the global “Net Zero Emissions”, to support 100% of our clients in their energy transition and to integrate non-financial performance criteria into the analysis of 100% of our financing to companies and farmers. Managed at the highest level of the bank, the Crédit Agricole climate strategy is based on ad hoc tools and experts teams throughout the whole Group. The Green Bond market is an essential refinancing channel for Crédit Agricole to communicate on our climate commitments, to engage with investors on our long-term vision and to finance the development of our green lending activities. Being an issuer on the Green Bond market is part of Crédit Agricole’s refinancing strategy to optimise the financing of our environmental and climate commitments. Moreover, this also meets our investors’ high expectations in term of investments.

Co-author of the Green Bonds Principles, Crédit Agricole CIB started issuing Green Notes in 2013. After the publication of a Group wide Framework in 2018, Crédit Agricole S.A. joined Crédit Agricole CIB as a Senior Unsecured Green Bond issuer for institutional investors and was followed by Covered Bond issuances from Crédit

Agricole Home Loan SFH, Crédit Agricole Italia and Crédit Agricole next bank. The Group also offers Green Bonds distributed through the retail networks of the Regional Banks and LCL to both individual customers and Wealth Management and Private Banking customers through the “Impact” product range.

Crédit Agricole also supports the Green Bonds market as an investor, through its own liquidity portfolio with a growing amount allocated to Green Bonds, and through the Crédit Agricole Group’s insurer, Crédit Agricole Assurances, and asset manager, Amundi. We are very proud to make the sixth Green Bond report available to Crédit Agricole’s investors, including the allocation and impact reports of Crédit Agricole S.A., Crédit Agricole Home Loan SFH, Crédit Agricole Italia and Crédit Agricole next bank Green Bonds as well as Crédit Agricole CIB’s Green Notes. The present report is the first one under the Group updated Green Bond Framework² published in November 2023, which is aligned with the ICMA’s Green Bond Principles and the best market practices, takes into account the EU Taxonomy Substantial Contribution Criteria (SCC) and integrates four new categories and more than twenty new activities. For the first time, this report includes an independent practitioner’s limited assurance report on the allocation and information on the alignment of the assets to the EU Taxonomy. Please note that from this year, the report is published as of end of December, in place of end of June. We are also pleased with the synergy between the Group’s teams and entities that have actively collaborated on this document.

CRÉDIT AGRICOLE GROUP COMMITMENT¹ TO SUSTAINABILITY

Crédit Agricole Group's commitment to sustainability strongly relies on Crédit Agricole S.A. "2025 Ambitions" medium-term plan, itself based on the Group's "Raison d'Être": "Work every day in the interest of our customers and society". Alongside the Customer Project focused on excellence in customer relations and the Human-centric Project, based on empowering the teams, Crédit Agricole's Societal Project is organized around two main objectives: pursuing the Group's commitment to inclusive development and making green finance a key driver of growth. As the Medium-Term Plan expires this year, a new Plan will be announced on November 18th, 2025, detailing more precisely Crédit Agricole's Medium-Term Sustainability Strategy.

As a signatory of the Equator Principles in 2003, the Climate Principles in 2008, the Principles for Responsible Banking and a participant in the United Nations' Collective Commitment to Climate Action since 2019, the Crédit Agricole Group has long been committed to the fight against climate change. It has made green finance an essential part of its Corporate Social Responsibility policy. Crédit Agricole's climate strategy is based on three complementary priorities:

- Accelerating the development of renewable and low-carbon energy by focusing our financings on renewable and low-carbon energy projects;
- Support all the customers in their transitions;
- Driving our exit trajectory from the financing of carbon based energy.

Crédit Agricole S.A., Amundi and Crédit Agricole Assurances² respectively joined the Net Zero Banking Alliance, Net Zero Asset Managers Initiative, and the Net Zero Asset Owner Alliance of the United Nations Environment Programme (UNEP-FI). In line with its Corporate Social Responsibility (CSR) Project, the Group is thus confirming the contribution of its climate strategy to the United Nations' sustainable development objectives and its ambition to be a major player in the climate transition by equipping all its clients, from large global corporates to the most modest households, with products and services based on green energy, and by constantly committing to an innovative and progressive approach.

Crédit Agricole has defined ambitious targets to accelerate transition towards carbon neutrality in 2050. After having disclosed its Net Zero Asset Owner (Crédit Agricole Assurances) and Net Zero Asset Managers (Amundi) commitments, Crédit Agricole identified in 2022 ten priority sectors to set Net Zero pathways for its banking activities. These ten sectors were selected considering a variety of factors among which their contribution to global greenhouse gas (GHG) emissions and Crédit Agricole's exposure to these sectors. Crédit Agricole Group published its progress at end-2024 on eight sectors which show very significant results for the Net Zero pathways.

¹ Main Crédit Agricole Group ESG disclosures in 2024:
[Crédit Agricole S.A. : Universal registration document](#)
[Crédit Agricole Group : Amendement A01 to the Universal registration document](#)
[Destination 2050 – Our climate transition plan](#)

² Crédit Agricole Assurances had also joined the Net Zero Insurance Alliance which ceased to exist on 25 April 2024 and was replaced by the Forum for insurance transition to Net Zero (FIT).

	2020 baseline	Progress at end-2024		2030 target
 Oil & Gas	24.3 Mt CO ₂ e	7.2 Mt CO ₂ e	-70%	-75%
	Crédit Agricole CIB's exposure to oil extraction decreased by -56% at end-2024 vs 2020, including through its customers (\$3.2bn in 2024 vs \$7.3bn in 2020), well ahead of the -25% reduction target by 2025.			
 Power	224 gCO ₂ e/kWh	160 gCO ₂ e/kWh	-29%	-58%
	<p>+141% low-carbon energy financing at end-2024 vs. 2020, standing at €26.3 billion. Financed energy mix increased from 50% low-carbon energy (renewable and nuclear energy) in 2020 to 82% at end-2024.</p> <p>+132% increase of Crédit Agricole CIB's exposure to low-carbon energy, incl. through its clients (€17.2 billion at end 2024 vs €7.4 billion in 2020), well ahead of the +80% target by 2025 compared to 2020.</p> <p>Continued decrease in Crédit Agricole CIB's exposure to thermal coal, including through its clients, at €410 million in 2024 versus €623 million in 2020, in line with the commitment to a full exit by 2030 in the OECD and EU and 2040 in the rest of the world.</p>			
 Automotive	190 gCO ₂ e/km	151 gCO ₂ e/km	-21%	-50%
 Commercial real estate	36.4 kgCO ₂ e/m ² /year	31.8 kgCO ₂ e/m ² /year	-13%	-40%
 Cement	671 kgCO ₂ t/t	693 kgCO ₂ t/t	+3%	-20%
	For this small portfolio (less than 10 customers), the end of the relationship with several relatively less carbon-intensive customers triggered an automatic increase of the portfolio intensity which does not reflect the reality of the sector or of Crédit Agricole's action			
 Aviation	1,003 gCO ₂ e/RTK	866 gCO ₂ e/RTK	-14%	-25%
	Baseline year 2019 was chosen in order to neutralise the effect of Covid on traffic.			
 Shipping	6.22 gCO ₂ e/DWT.nm	5.23 gCO ₂ e/DWT.nm (data at end-2023)	-16% (data at end-2023)	-36%
 Steel	1.88 tCO ₂ e/t	1.82 tCO ₂ e/t	-3%	-26%
	The carbon intensity of the portfolio is slightly decreasing compared to the 2020 baseline. The steering of the Steel pathway will also have to cope with a complex market context. In the European market in particular, a sizable part of decarbonization efforts have been put on hold, pending the implementation of the Carbon Border Adjustment Mechanism in 2026 and the ability of the European Union to stem the inbound flow of steel. Nevertheless, the Group is committed to support its steelmaking clients in decarbonization of their activity, by replacing blast furnaces with electric arc furnaces.			

Crédit Agricole reminds its ambitions in Residential real estate and Agriculture.

Commitments in the **Residential real estate sector**:

- Crédit Agricole is committed to supporting property owners and contributing to the achievement of France's target of 12.4 kgCO₂e/m²/year by 2030. Decarbonisation will depend on the mobilization of all stakeholders (homeowners, public policy, construction sector) while reflecting the heterogenous nature of French regions.

Commitments for the **Agriculture sector**:

- Crédit Agricole is committed to supporting the agricultural world in its decarbonisation efforts while strengthening food sovereignty:
 - by providing support in relation to the roadmaps set by the industry and its sectors (work in progress),
 - by supporting the decarbonisation levers already identified by the sectors,
 - by adapting its support while respecting ecosystems, regions and stakeholders,
 - throughout France and at farm level.

In addition to these commitments, Crédit Agricole S.A. also committed to decrease its operational carbon footprint related to energy consumption by buildings and the vehicle fleet (scopes 1 and 2) and linked to business travel (scope 3 category 6) by -50% between 2019 and 2030 (absolute emissions target). The Group's climate action is in line with its commitment to contribute to global carbon neutrality by 2050, and the Group's climate strategy fully contributes to its medium-term plan revenue generation targets.

Aware of the impact of its own operations on the environment, Crédit Agricole Group remains committed to using less carbon-intensive electricity, with the aim of achieving 100% renewable electricity by 2030 at all its French and international sites and is continuing its efforts to reduce energy consumption by maintaining its efficiency plan in order to anchor these new behaviors over time. New tests are being carried out to take energy efficiency even further, such as combining staff in order to mothball buildings that are not very busy at certain times of the year.

2024 KEY FIGURES¹

¹ As of December 2024

² This figure does not include CACIB Taiwan Green Issuances

³ Including €3.3bn loans included in the CA Home Loan SFH Eligible pool of €4.9bn.

⁴ Including €1.6bn loans included in the CA Home Loan SFH Eligible pool of €4.9bn.

The Credit Agricole Group is pleased to disclose for the first time, the alignment of its eligible Green Assets to the EU Taxonomy, for the Group EU entities that issue benchmark bonds. Please note the following points:

- The covered bond vehicles CA HL SFH and CA Italia have a percentage of alignment which is higher than Crédit Agricole S.A. as their assets are European home loans only (French for CA HL SFH and Italian for CA Italia);
- The information for CA next bank is not presented here as it is a non-EU entity.

In addition, Crédit Agricole SA and its entities green loans' portfolio respect the exclusion criteria of the EU Paris Aligned Benchmark (EU PAB) exclusions⁴.

Alignment to the EU Taxonomy

	Crédit Agricole SA Green Bonds	CA HL SFH Green Bonds	CA Italia Green Bonds
% of assets aligned with the SCC of the EU Taxonomy	66 %	83 %	68 %
% of assets fully aligned with the EU Taxonomy	26 %	74 %	48 %

¹ Included in the Green Buildings Eligible Activity of the Green Bond Framework 2023, in the sub-category "Individual renovation measures".

² Gap between CACIB and other entities is mainly due to CACIB portfolio sectorial mix and to the geographical diversification of CACIB Renewable Energies portfolio contributing to the development of wind and solar infrastructure in countries showing more carbon intensive electricity mix than France where the Regional Banks and LCL operate.

³ tCO₂/CHFm²

⁴ In May 2024, the ESMA released guidelines on fund names, outlining specific requirements for using ESG or sustainability related terms in funds' names. In December 2024, the ESMA has provided further clarification on the application of the guidelines for use of proceeds instruments. These guidelines apply to investors who may invest in Crédit Agricole's green bond offering. Sector exclusions and the current eligible portfolio ensure that all exclusions applicable to PABs are covered.

OVERVIEW OF CREDIT AGRICOLE GROUP GREEN BOND FRAMEWORK

The Crédit Agricole Group Green Bond Framework¹ updated in November 2023 replaces the one published in 2018 and now serves as the reference document for the Green Bond issuances of all issuing Crédit Agricole Group entities: Crédit Agricole S.A., Crédit Agricole CIB, CA Home Loan SFH, CA Italia and CA next bank. Please note that this report is the first one issued under the updated Green Bond Framework published in November 2023.

1. USE OF PROCEEDS

Eligible projects categories:

- Renewable energy generation
- Transmission of distribution of electricity
- Energy storage
- Green buildings
- Clean transportation vehicles
- Clean transportation infrastructures
- Data processing, hosting and related activities
- Waste management
- Water management facilities construction and renewal
- Waste water management facilities construction and renewal
- Sustainable agriculture
- Circular Economy
- Preservation of biodiversity & sustainable management of living natural resources and land
- Nuclear Energy²

2. PROCESS FOR PROJECT EVALUATION AND SELECTION

- Eligible Green Assets comply with Crédit Agricole standard credit process including the Group's CSR strategy and dedicated Sector Policies as well as any applicable environmental and social regulatory directives. Reinforced dedicated ESG risks analysis are performed at each business entity level, in connection with the Group's CSR management team.
- Crédit Agricole has set-up a dedicated Green and Social Bond Committee to manage the Process for Project Evaluation and Selection of the eligible assets.

3. MANAGEMENT OF PROCEEDS

- Crédit Agricole's Finance and Treasury divisions are in charge of monitoring the allocation of the proceeds to the Eligible Assets on a nominal equivalence basis, as well as managing the Green Portfolio.
- At least on a semi-annual basis, Crédit Agricole ensures that the total amount of funds raised via the Green Bond issuances, is lower than the total amount of Green Eligible Assets in the Green Portfolio.
- The amount of the Green Portfolio will always exceed the amount of the Green Bonds issued by a factor of 10%. In practice, this implies that amortised or redeemed Eligible Assets are replaced by new Eligible Assets.

4. REPORTING

Annual report published on the Group's website detailing until maturity:

- The allocation of the Green Bonds' net proceeds;
- The environmental impact of the Eligible Green Assets by Eligible Category and issuing entity;
- The limited assurance report on the allocation by an independent practitioner.

Crédit Agricole Green Bond Framework aligns with the 2021 edition of the Green Bond Principles ("GBP") and follows its four core components, Use of Proceeds, Process for Project Evaluation and Selection, Management of proceeds and Reporting.

The Crédit Agricole Group Green Bond Framework have been reviewed by ISS Corporate Solutions (ICS) which delivered positive second opinion available at: <https://www.credit-agricole.com/en/finance/debt-and-ratings>

¹Crédit Agricole Green Bond Framework 2023

²Please note that nuclear energy assets may be allocated only to Crédit Agricole CIB issuances. As of today, no nuclear energy assets have been allocated to Crédit Agricole CIB issuances, but Crédit Agricole CIB reserves the right to include nuclear proceeds in its specific green notes. For the sale of clarity, nuclear proceeds will explicitly be disclosed in the Use of Proceeds list of the transactions in which they will be included. This disclosure will be made at execution at the latest.

CREDIT AGRICOLE S.A. GREEN PORTFOLIO AS OF DECEMBER 2024

THE FOLLOWING GRAPHS DESCRIBE THE ELIGIBLE PORTFOLIO ALLOCATED TO THE GREEN BONDS ISSUED BY CRÉDIT AGRICOLE S.A. (ALLOCATED TO ELIGIBLE ASSETS COMING FROM CRÉDIT AGRICOLE CIB, CRÉDIT AGRICOLE REGIONAL BANKS, LCL AND CAL&F) :

Breakdown by Subsidiaries (% of outstanding amount)

As of today, Crédit Agricole S.A. selected eligible pool amounts to c. EUR 6.2bn mainly composed of CACIB (47%) financings well represented among every Eligible Category and followed by the Crédit Agricole Regional Banks (42%) driven by their substantial Green Buildings and Renewable Energies portfolios and to a lower extent by LCL (10%) and CAL&F (1%).

Breakdown by Eligible Categories (% of outstanding amount)

The eligible pool is mainly composed of Green Buildings (48%) as a historical core activity of the Group on both the residential and commercial segments followed by Renewable Energies (38%) reflecting the leading position of the Group with €26.3bn in low-carbon energy financing as of 31/12/2024¹, driven by both CACIB global Project Finance portfolio and Crédit Agricole Regional Banks and LCL retail financing portfolios. Remaining categories are composed of Energy Efficiency (8%) including French loans to energy refurbishment ("Eco-PTZ"² and "Prêts Economie d'Energie"³) as well as smart grid solutions and related services and Clean Transportation (6%) mainly financing public transport infrastructure projects and rolling stocks.

Focus on Green Buildings and Renewable Energies categories

Crédit Agricole S.A. Green Buildings eligible pool of assets, selected for the allocation of its Green Bonds, amounts to EUR 3.0bn mainly composed of residential home loans financing new buildings for Crédit Agricole Regional Banks (43%) and LCL (16%), followed by CACIB (41%) portfolio.

Crédit Agricole S.A. Renewable Energies eligible pool of assets, selected for the allocation of its Green Bonds, amounts to c. EUR 2.3bn mainly composed of CACIB (55%) portfolio financing predominantly both solar and wind energy projects (cf. CACIB focus below) followed by the Crédit Agricole Regional Banks (37%) and LCL (5%) financing smaller local projects and retail clients' equipment and by CAL&F (3%).

¹ Assets linked to low-carbon energy comprising renewable energy produced by the customers of all Crédit Agricole Group entities, including assets linked to nuclear energy in the case of Crédit Agricole CIB

² Éco-prêt à taux zéro (éco-PTZ) | [Service-Public.fr](https://www.service-public.fr)

³ Prêt économies d'énergies ([bpi.france.fr](https://www.bpi.france.fr))

Breakdown by Regions (% of outstanding amount)

As CACIB is the only entity operating on a global scale allowing a geographical diversification of its portfolio, the majority of the Group's Green eligible pool of assets finances projects located in France (63%) and the remaining share is distributed between Europe excl. France (18%), Americas (10%), Asia Pacific (7%) and to a lower extent the MEA region (1%).

CRÉDIT AGRICOLE S.A. “SUSTAINABLE CITY” RETAIL GREEN PORTFOLIO AS OF DECEMBER 2024

THE FOLLOWING PARAGRAPHS DESCRIBE THE ELIGIBLE PORTFOLIO ALLOCATED TO THE “SUSTAINABLE CITY” BONDS ISSUED BY CRÉDIT AGRICOLE S.A. DISTRIBUTED TO RETAIL CUSTOMERS OF LCL (LCL IMPACT VILLE DURABLE AND LCL AUTOCALL CITY TRANSITION) :

Breakdown by Subsidiaries (% of outstanding amount)

As of today, Crédit Agricole S.A. selected eligible pool for “Sustainable City” bonds amounts to c. EUR 1.3bn composed of 100% of home loans coming from LCL.

Breakdown by Categories (% of outstanding amount)

It is composed of home loans exclusively financing new or existing housing either belonging to the local top 15% of most energy efficient buildings or buildings meeting the criteria specified in Section 7.1 of the Delegated Act of the EU Taxonomy as specified in Appendix A of the Green Bond Framework available [here](#). Originated by LCL, Eligible Green home loans finance properties 100% located in France.

COVERED BOND ISSUING ENTITIES GREEN PORTFOLIO AS OF DECEMBER 2024

THE FOLLOWING GRAPHS DESCRIBE THE ELIGIBLE PORTFOLIO ALLOCATED TO THE GREEN BONDS ISSUED BY EACH COVERED BOND ISSUING ENTITY:

CRÉDIT AGRICOLE HOME LOAN SFH

Crédit Agricole Home Loan SFH Green Covered selected eligible pool amounts to c. EUR 4.9bn. It is composed of home loans exclusively financing new or existing housing either belonging to the local top 15% of most energy efficient buildings or buildings meeting the criteria specified in Section 7.1 of the Delegated Act of the EU Taxonomy as specified in Appendix A of the Green Bond Framework available [here](#). Originated by the Crédit Agricole Regional Banks and LCL, Eligible Green home loans finance properties 100% located in France.

The average year of loans in the selected eligible pool is older than the average origination year of our eligible home loans portfolio, as loans also have to comply with eligibility criteria of the SFH collateral which favors older loans (including maximum level of Loan-To Value, at least one installment paid, loans fully disbursed, etc.).

Breakdown by year of origination
(% of outstanding amount)¹

CRÉDIT AGRICOLE ITALIA

Crédit Agricole Italia Green Covered eligible pool of assets, selected for the allocation of its Green Bonds, amounts to c. EUR 1.3bn. It is composed of residential home loans exclusively financing new or existing residential buildings either belonging to the local top 15% of most energy efficient buildings or buildings meeting the criteria specified in Section 7.1 and 7.7 of the Delegated Act of the EU Taxonomy as specified in Appendix A of the Green Bond Framework available [here](#). Eligible Green residential loans finance properties 100% located in Italy.

Breakdown by year of origination
(% of outstanding amount)

CA NEXT BANK GREEN PORTFOLIO

Crédit Agricole next bank Green Cover eligible pool of assets, selected for the allocation of its Green Bonds, amounts to c. CHF 0.9bn. It is composed of residential home loans exclusively financing new or existing housing belonging to the local top 15% of most energy efficient buildings, as specified in Appendix A of the Green Bond Framework available [here](#). Eligible Green residential loans finance properties 100% located in Switzerland.

Breakdown by year of origination
(% of outstanding amount)

¹ Corresponding to the year of first drawing for the eligible assets coming from the Crédit Agricole Regional Banks

CRÉDIT AGRICOLE CIB GREEN PORTFOLIO AS OF DECEMBER 2024

THE FOLLOWING GRAPHS DESCRIBE THE ELIGIBLE PORTFOLIO ALLOCATED TO THE SENIOR UNSECURED NOTES ISSUED BY CRÉDIT AGRICOLE CIB:

Breakdown by Eligible Categories (% of outstanding amount)

Crédit Agricole CIB eligible pool of assets amounts to c. EUR 14bn. It is mainly composed of Green Buildings (47%) as a historical core activity of the Group on both the residential and commercial acquisition, construction and renovation segments and Renewable energies (41%) supported by its recognized Project Finance expertise followed by Clean transportation (11%) mainly focused on rail public transportation infrastructure projects and passenger/ freight fleet financings..

Renewable Energies Breakdown (% of outstanding amount)

Crédit Agricole CIB Renewable Energies eligible pool of assets is mainly composed of Wind (41%) and Solar (40%) assets while the remaining 19% represent assets combining both Solar and Wind (16%) and a small share of Geothermal assets (3%)¹ which are gradually growing resulting in a diversification of the portfolio..

Breakdown by year of credit signing date (% of outstanding amount)

60% of Crédit Agricole CIB eligible pool of assets is composed of loans of less than 3 years. More than 80% of the Crédit Agricole CIB eligible pool of assets is composed of loans of less than 5 years.

Breakdown by Regions² (% of outstanding amount)

More than half of Crédit Agricole CIB Green eligible pool of assets finances Europe based projects (60%) with a strong focus on France (21%), historical core market of the bank driven by the wide diversified footprint of the Group, followed by Americas (22%), Asia Pacific (16%) and to a lower extent MEA (2%), all showing growing interest and needs for green financing.

¹ Including Geothermal assets combined with Solar.

² Regions where the financed project is located or the borrower's risk is located.

EXAMPLES OF ELIGIBLE ASSETS

SUPPORTING SOLAR ENERGY DEVELOPMENT IN ITALY

Financing of an independent renewable electricity producer

Description :

Crédit Agricole Transitions & Énergies, through Unifergie, arranged financing for the construction of a photovoltaic power plant in Sardinia for Qair, a long-standing client of the Crédit Agricole group and an independent renewable electricity producer. The financing was provided by Crédit Agricole Leasing & Factoring, Crédit Agricole du Languedoc and CA Italia respectively acted as the hedging bank and account holding bank.

With a total capacity of approximately 8.7 MW, the plant came online in December 2024 and is expected to produce 12.7 GWh of renewable energy per year, equivalent to the annual consumption of 3,000 households and avoiding the equivalent of 350 tons of CO₂ emissions. The Marrubiù plant is part of a portfolio of projects being developed by Qair, with a total estimated capacity of nearly 2 GW. This operation contributes to the development of renewable energy in the region.

Timing

Active since
December 2024

Asset

Solar photovoltaic
power plant

Location

Marrubiù,
Sardinia, Italy

SUPPORTING THE DEVELOPMENT OF SOLAR ENERGY IN FRANCE

Financing of ground-mounted solar farms from an independent renewable electricity producer

Description :

Crédit Agricole Transitions & Énergies, alongside the Group's Regional Banks*, supported TSE, a major player in the energy transition and renewable energy in France, in financing a €93 million project to build and operate a portfolio of seven ground-mounted solar farms with a total capacity of 120 MW. Spread across several sites in France (Ardenne, Seine-Maritime, Cher, Nord, Loiret), they will contribute to producing clean, renewable energy equivalent to the annual consumption of more than 65,000 residents. This transaction marks an important step in TSE's strategy to develop renewable energy production in France.

*Regional Banks of Alpes-Provence, Centre-Loire, Champagne-Bourgogne, Nord de France and Nord Est

Timeline

Commissioning by the end
of 2026

Asset

Photovoltaic solar
power plants

Location

Northern half
of France

SUPPORTING FRENCH SOLAR POWER DEVELOPMENT

Financing of a ground-mounted photovoltaic power plant from an independent renewable electricity producer

Description :

LCL participated in financing a project carried out by Générale du Solaire Group, the construction of a ground-mounted photovoltaic power plant located in the municipality of Audenge (33). This plant, covering an area of 40 hectares, with a capacity of 19.8 MWp, has made it possible to repurpose a former final waste storage facility and produces the equivalent of the consumption of 8,052 households.

The Générale du Solaire Group is a 100% French expert in the development, engineering, construction, and operation of photovoltaic power plants as well as an electricity producer in France and internationally.

Timing

2022

Asset

Solar photovoltaic power plant

Location

Audenge (33), France

SUPPORTING THE OPENING OF THE REGIONAL PASSENGER RAIL MARKET IN FRANCE

CACIB played a lead role in financing the acquisition by local public company of a TER fleet for three French regions

Description :

The SPIIT and GAAM transactions are two landmark transactions for the French regional passenger rail sector with Région Hauts de France (the “GAAM” Transaction) and a consortium of Région Occitanie and Région Nouvelle Aquitaine (the “SPIIT” Transaction). These transactions will both finance mainly electric or bi-mode trains.

SPL SPIIT will finance the acquisition of c. 260 second hand TER trains and c. 40 new trains while SPL GAAM will finance the acquisition of c. 220 second hand TER trains and c. 33 new trains.

These two transactions will ensure a competitive and high-quality public transport service promoting sustainable mobility and the decarbonization of transport in the context of the opening of the regional passenger rail market in France.

Timing

Progressive transfer of the fleet from 2024 to 2028 / 2030 for respectively GAAM / SPIIT

Asset

Clean Transportation
- Passenger Trains

Location

Région Hauts de France,
Région Occitanie
and Région Nouvelle
Aquitaine

CARBON IMPACT REPORTING

CRÉDIT AGRICOLE GREEN BOND REPORT IS FOCUSED ON THE ASSESSMENT OF ELIGIBLE GREEN ASSET CONTRIBUTION TO CLIMATE CHANGE MITIGATION (EXPRESSED IN TONS OF ANNUAL AVOIDED EQ.CO₂ EMISSIONS), IN LINE WITH ICMA GREEN BOND PRINCIPLES RECOMMENDATIONS.

Depending on the granularity of available environmental data related to Eligible Green Assets, Crédit Agricole applied a three-level methodological approach: a project-based approach when feasible especially for project finance assets, a corporate based approach for corporate finance assets and a sectoral approach for highly granular asset portfolio such as Crédit Agricole Regional Banks retail loan portfolio. The following section

(‘Methodological notes’) introduces in detail the main assumptions and emission factor sources used for this calculation. Carbon impact of each Crédit Agricole Green Bond is estimated on a pro rata basis of their contribution to refinance the overall Green Portfolio, as defined in the Crédit Agricole Green Bond Framework. Orders of magnitude (rounded to the nearest unit) are presented in the table below accordingly to the data accuracy.

DETAILS BY ENTITY¹

Crédit Agricole S.A. GREEN BONDS 235 tCO₂e avoided emissions per €m invested annually	Eligible Category	Allocation (m€)	CO ₂ e Avoided Emissions Intensity (tCO ₂ e/€m.y)	CO ₂ e Avoided Emissions (tCO ₂ e/y)	Contribution to the SDGs of the United Nations ²
	Clean Transportation ³	255	1,156	294,867	 
	Energy Efficiency ⁴	383	74	28,347

	TOTAL	4,547	235	1,069,644	

Crédit Agricole S.A. “Sustainable city” RETAIL GREEN BONDS 4 tCO₂e avoided emissions per €m invested annually	Eligible Category	Allocation (m€)	CO ₂ e Emissions Avoided Intensity (tCO ₂ e/€m.y)	CO ₂ e Emissions Avoided (tCO ₂ e/y)	Contribution to the SDGs of the United Nations
	Green Buildings	230	4	845	  
	TOTAL	230	4	845	

¹ Due to rounding, the data presented in the tables do not represent the precise tCO₂e/y impact indicators

² This Eligible category partly includes the following EU Taxonomy activities: Clean Transportation vehicles: 6.1 Passenger interurban rail transport, 6.2 Freight rail transport, 6.3 Urban and suburban transport, road passenger transport, 6.6 Freight transport services by road. Clean Transportation infrastructures: 6.14 Infrastructure for rail transport, 6.15 Infrastructures enabling low carbon road transport and public transport 6.16 Infrastructure enabling low carbon water transport

³ This Eligible category partly includes the following EU Taxonomy activities: Clean Transportation vehicles: 6.1 Passenger interurban rail transport, 6.2 Freight rail transport, 6.3 Urban and suburban transport, road passenger transport, 6.6 Freight transport services by road. Clean Transportation infrastructures: 6.14 Infrastructure for rail transport, 6.15 Infrastructures enabling low carbon road transport and public transport 6.16 Infrastructure enabling low carbon water transport

⁴ This Eligible category partly includes the following EU Taxonomy activities: Commercial and Residential real estate: 7.2 Renovation of existing buildings, 7.3 Installation, maintenance and repair of energy efficiency equipment, 7.4 Installation, maintenance and repair of charging stations for electric vehicles in buildings, 7.5 Installation, maintenance and repair of instruments and devices for measuring, regulation and controlling energy performance of buildings, 7.6 Installation, maintenance and repair of renewable energy technologies.

⁵ This Eligible category partly includes the following EU Taxonomy activities: Commercial and Residential real estate: 7.1 Construction of new buildings, 7.7 Acquisition and ownership of buildings.

⁶ This Eligible category partly includes the following EU Taxonomy activities: 4.1 Electricity generation using solar photovoltaic technology, 4.2 Electricity generation using concentrated solar power (CSP) technology, 4.3 Electricity generation from wind power, 4.6 Electricity generation from geothermal energy.

FOCUS ON CRÉDIT AGRICOLE GREEN BUILDING¹ PORTFOLIO

Green Buildings is one of the main Eligible Green Categories financed by Crédit Agricole S.A. Green Bonds, Crédit Agricole CIB Green Notes, the CA Home Loan SFH Green Covered Bonds, CA Italia Green Covered Bonds and CA next bank Green Covered bonds. All in all, **€8.6bn** of Real Estate loans are refinanced through Green Bonds issued by the Crédit Agricole Group entities. However, the composition of each Real Estate sub-portfolio varies and leads to different carbon impacts as follow:

- **Crédit Agricole S.A. Green Bonds:** Crédit Agricole S.A. Green Bonds refinance Crédit Agricole CIB real estate portfolio and a portfolio of loans for new and existing residential properties in France granted by the Crédit Agricole Regional Banks and LCL. Given France's low-carbon energy mix and relatively low energy consumption per square meter of existing buildings, this portfolio is characterized by an intensity of avoided emissions of **5 tCO₂e/€m.y** and an intensity of energy savings of **37 MWh/€m.y**.
- **Crédit Agricole S.A. "Sustainable City" retail Green Bonds:** Crédit Agricole S.A. "Sustainable City" retail Green Bonds refinance a portfolio of loans for new and existing residential properties in France granted by LCL. Given France's low-carbon energy mix and relatively low energy consumption per square meter of existing buildings, this portfolio is characterized by an intensity of avoided emissions of **4 tCO₂e/€m.y** and an intensity of energy savings of **34 MWh/€m.y**.
- **Crédit Agricole CIB Green Notes:** Crédit Agricole CIB has a diversified real estate portfolio with a tilt towards commercial assets. The intensity of avoided emissions is **4 tCO₂e/€m.y**, and an intensity of energy savings **17 MWh/€m.y**.
- **Green Covered Bonds SFH:** The Green Covered Bonds refinance a large portfolio of new and existing residential properties in France. Given France's low-carbon energy mix and relatively low energy consumption per square meter of existing buildings, this portfolio is characterized by an intensity of avoided emissions of **6 tCO₂e/€m.y** and an intensity of energy savings of **54 MWh/€m.y**.
- **Green Covered Bonds Credit Agricole Italia:** The Green Covered Bonds refinance a large portfolio of new and existing residential properties in Italy. Given Italian residential buildings' low energy consumption per square meter, this portfolio is characterized by a small impact intensity of **19 tCO₂e/€m.y** and an intensity of energy savings of **95 MWh/€m.y**.
- **Green Covered Bonds Credit Agricole next bank:** The Green Covered Bonds refinance a portfolio of new and existing residential properties in Switzerland. Swiss residential buildings' low energy consumption per square meter and high price of the housing market, this portfolio is characterized by a small impact intensity of **2 tCO₂e/CHFm.y** and an intensity of energy savings of **15 MWh/CHFm.y**.

Entities	Allocation (€m)	CO ₂ e Emissions Avoided Intensity (tCO ₂ e/€m.y)	CO ₂ e Emissions Avoided (tCO ₂ e/y)	Energy Savings Intensity (MWh/€m.y)	Energy Savings (MWh/y)
Crédit Agricole S.A.	2,195	5	10,875	37	80,782
Crédit Agricole S.A. « Sustainable City »	230	4	845	34	7,873
Crédit Agricole CIB	2,422	4	10,357	17	40,675
Crédit Agricole Home Loan SFH	2,500	6	14,406	54	134,205
Crédit Agricole Italia	1,000	19	18,711	95	95,135
Crédit Agricole next bank ²	450	2	1,005	15	6,671

FOCUS ON CRÉDIT AGRICOLE RENEWABLE ENERGIES PORTFOLIO :

- The gap between Crédit Agricole CIB and Crédit Agricole S.A. Renewable Energies portfolios carbon impacts (**686 tCO₂e/€m.y vs. 429 tCO₂e/€m.y**) and clean energy produced intensities (**1 795 MWh/€m.y vs. 1 396 MWh/€m.y**) is related to the geographical repartition of both portfolios. While Crédit Agricole S.A. is mostly focused on French assets installed on a low carbon-intensity electric grid, Crédit Agricole CIB finances assets around the world, including countries with carbon-intensive power generation.

Entities	Allocation (€m)	CO ₂ e Emissions Avoided Intensity (tCO ₂ e/€m.y)	CO ₂ e Emissions Avoided (tCO ₂ e/y)	Energy Savings Intensity (MWh/€m.y)	Energy Savings (MWh/y)
Crédit Agricole S.A.	1,714	429	735,554	1,396	2,391,891
Crédit Agricole CIB	2,109	686	1,445,728	1,795	3,784,873

¹Excluding Energy efficiency

²Figures presented in CHFm

METHODOLOGICAL NOTES

General remarks

Using the ICMA Handbook Harmonised Framework for Impact Reporting and the EIB's Project Carbon Footprint Methodologies Crédit Agricole developed a three-level methodological approach depending on figures and data available in its internal credit system:

- A project-based approach based on the Crédit Agricole knowledge of underlying assets. This approach has been used particularly to assess carbon impact of project finance assets;
- A corporate-based approach for corporate loans financing environmental activities, such as public transportation operators;
- A sectoral approach for very high granularity portfolios such as retail bank portfolio of solar PV loans and residential mortgages.

The three level methodologies give an interesting view on the availability and the quality of data ('Activity data') in the current system of the bank. It also indicates where the next priorities for improvement of our lending activities' carbon impact assessment system would be. The Green Bond Committee and its related Green Project Committee are in charge of advising the Crédit Agricole Group entities on the most relevant way to reach this goal.

The EIB methodology for assessing project GHG emissions, "EIB Project Carbon Footprint Methodologies"¹, has been used as a benchmark. This document contains the guidelines for assessing the GHG emissions for different kinds of environmental projects, as well as default values of emission factors ('Emission factor') needed for the calculation.

When necessary, factors and values from EIB methodology are complemented by other public sources such as:

- **International Renewable Energy Agency (IRENA)** - Renewable Power Generation Costs in 2023.²
- **Partnership for Carbon Accounting Financials (PCAF)** - European building emission factor database.³

Renewable Energies:

Avoided emissions (tCO₂/year) = Effective emissions - Baseline emissions = (Activity data * Emission Factor) - (Activity data * Baseline Emission Factor)

As per EIB methodology, the avoided emission of renewable energy projects is assessed against country-specific baselines for either intermittent electricity generation (used for solar and wind electricity generation) and firm electricity generation (used for biomass, geothermal, hydro and facilities for which the technology is unknown).

Activity data (kWh/year):

Energy produced annually by the renewable energy assets derived from:

- Project documentation in the case of project-based approach;
- Activity data published on data.gouv in the case of sectoral approach in France;
- Renewable energies construction cost⁴ in the case of sectoral approach.

¹ European Investment Bank (EIB) (2023). EIB Project Carbon Footprint Methodologies: Methodologies for the assessment of project greenhouse gas emissions and emission variations. Available at: https://www.eib.org/attachments/lucall/eib_project_carbon_footprint_methodologies_2023_en.pdf

² International Renewable Energy Agency (IRENA) (2023). Renewable Power Generation Costs in 2022. Available at: https://mc-cd8320d4-36a1-40ac-83cc-3389-cdn-endpoint.azureedge.net/-/media/Files/IRENA/Agency/Publication/2023/Aug/IRENA_Renewable_power_generation_costs_in_2022.pdf?rev=cccb713bf8294cc5bec3f870elfal5c2

³ Partnership for Carbon Accounting Financials (PCAF) (2023) - European building emission factor database. Available at: <https://building-db.carbonaccountingfinancials.com/index.php>

⁴ Renewable energy construction cost for assets from the Regional Banks and LCL are estimated as per Unifergie portfolio which is a leader in this market in France. Irena figures for CACIB due to its international activities.

Green buildings - Acquisition/Construction:

Avoided emissions (tCO₂/year) = Effective emissions – Baseline emissions = (Activity data * Emission Factor) – (Activity data * Baseline Emission Factor)

Carbon impact is assessed by comparing GHG emissions from energy demand of new Green Buildings to local average energy demand of the same type of buildings (offices, residential, etc.) from PCAF, the US EIA Annual Energy Review as well as national database (including ADEME database, for France)

Activity Data (kWh/m²/year):

Energy demand from Green Buildings derived from:

- Project documentation or average energy performance of the commercial or residential portfolio for which data is available in the case of project-based approach;
- National database using surface in a given area and the year of construction (e.g. INSEE, ADEME database, for France) in the case of sectoral approach.

Green buildings – Renovation of existing buildings (project-based approach only for Commercial Real Estate)

Carbon impact (tCO₂/year) = Emission Saved = (Activity data * Energy Saving * Emission Factor)

Environmental impact is assessed by applying the reduction in energy consumption resulting from the renovation works to the Green Building effective annual energy consumption.

Activity Data (kWh/m²/year):

Energy demand from Green Buildings derived from :

- Project documentation or average energy performance of the commercial or residential portfolio for which data is available in the case of project-based approach.

Green buildings - Energy Efficiency (sectoral approach for retail)

Carbon impact (tCO₂/year) = Emission Saved = (Amount financed * Energy Savings per EUR * Emission Factor)

Environmental impact is assessed by applying the reduction in energy consumption resulting from the renovation works. Energy Savings is estimated on a sectoral approach in the context of ECO PTZ in the French retail.

Green Buildings – Energy efficiency (Commercial Real Estate)

Carbon impact (tCO₂/year) = Emission Saved = (Activity data * Energy Saving * Emission Factor)

This Eligible Category is gathering projects related to smart metering. The quantification of avoided carbon emissions is estimated based on EU Commission smart meters energy saving by household calculation.

Activity data (kWh):

- Total energy consumption covered by smart meters deployed based on national average energy consumption by household and number of smart meter deployed based on costs per metering point using European Commissions estimation as proxy¹.

Clean transportation – Rolling Stock

Carbon impact (tCO₂/year) = Effective emissions – Baseline emissions = (Activity data * Emission Factor) – (Activity data * Baseline Emission Factor)

GHG emissions due to public mass transportation projects are compared to road transportation baseline, respectively cars for passenger transportation and trucks for freight transportation.

Activity data (pkm or tkm):

- Total kilometer traveled by passenger for passenger transportation and by tonnes for freight transportation derived from project documentation for project-based approach; or
- Total kilometer traveled by passenger for passenger transportation and by tonnes for freight transportation derived from corporate communication of operators managing and operating these infrastructures (together referred as 'Infrastructure and network' in the table above) for corporate-based approach; or
- Total kilometer traveled by passenger for passenger transportation and by tonnes for freight transportation estimated based on sector statistics

Clean transportation – Infrastructure (Project-based approach only)

Carbon impact (tCO₂/year) = Effective emissions² – Baseline emissions = (Activity data * Emission Factor) – (Activity data * Baseline Emission Factor)

GHG emissions due to public mass transportation projects are compared to road transportation baseline, respectively cars for passenger transportation and trucks for freight transportation.

Activity data (pkm/year or tkm/year):

- Total kilometer traveled by passenger or seats for passenger transportation and by tonnes for freight transportation derived from project documentation of project finance assets or corporate communication of operators managing and operating these infrastructures (together referred as 'Infrastructure and network' in the table above) or
- Total kilometer traveled by passenger or seats for passenger transportation and by tonnes for freight transportation estimated based on sector statistics.

¹ European Commission (2020). Benchmarking smart metering deployment in the EU-28: Final report. Available at : https://energy.ec.europa.eu/publications/benchmarking-smart-metering-deployment-eu-28_en

² Effective emissions are now including an estimation (as far as possible) of the annual emissions related to the construction of the related infrastructure.

AUDITOR'S REPORT

Independent practitioner's limited assurance report on the sustainability information in the Crédit Agricole Group's 2024 Green Bond Impact Report (31 December 2024)

To the Directors of Crédit Agricole S.A.

12 Place des Etats-Unis
92127 Montrouge cedex

Limited assurance conclusion

In accordance with section "V.B External Audit" of the "Crédit Agricole Green Bond Framework" published in November 2023 (the "2023 Green Bond Framework"), we have conducted a limited assurance engagement on the sustainability information of Crédit Agricole Group (the "Company") presented below and included from page 15 to page 16 in the tables "Details by entity", (the "Tables") of the 2024 Green Bond Impact Report (the "2024 Green Bond Impact Report") (the "Identified Sustainability Information"):

- the information related to the allocation as at 31 December 2024 presented in the column "Allocation" of the Tables "Crédit Agricole S.A. GREEN BONDS", "Crédit Agricole S.A. "Sustainable city" RETAIL GREEN BONDS", "Crédit Agricole CIB GREEN NOTES", "Crédit Agricole Home Loan SFH GREEN COVERED BONDS", "Crédit Agricole Italia GREEN COVERED BONDS" and "Crédit Agricole Next Bank GREEN COVERED BONDS", in respect of the green bonds issued by Crédit Agricole S.A., Crédit Agricole CIB, Crédit Agricole Home Loan SFH, Crédit Agricole Italia and Crédit Agricole Next Bank listed in the appendices "1. CRÉDIT AGRICOLE S.A. OUTSTANDING GREEN BONDS AS OF DECEMBER 2024", "2. CRÉDIT AGRICOLE S.A. OUTSTANDING "SUSTAINABLE CITY" RETAIL GREEN BONDS AS OF DECEMBER 2024", "3. CRÉDIT AGRICOLE GROUP OUTSTANDING GREEN COVERED BONDS AS OF DECEMBER 2024" and "4. CRÉDIT AGRICOLE CIB OUTSTANDING GREEN NOTES AS OF DECEMBER 2024" of the 2024 Green Bond Impact Report for a total aggregate amount of EUR 13 690 666 390 (the "2024 Green Bonds") to the Crédit Agricole Group's green assets presented in section "OVERVIEW OF CRÉDIT AGRICOLE GROUP GREEN BOND FRAMEWORK" of the 2024 Green Bond Impact Report (the "Eligible Assets");
- the Eligible Assets as described in the section "IV.A Use of Proceeds" of the 2023 Green Bond Framework published in November 2023.

Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the Identified Sustainability Information is not prepared, in all material respects, in accordance with the criteria set out in section "IV.A Use

of Proceeds" of the 2023 Green Bond Framework available on the Company's website and applied as explained in section "Overview of Crédit Agricole Group Green Bond Framework" of the 2024 Green Bond Impact Report.

Basis for conclusion

We conducted our limited assurance engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised), Assurance engagements other than audits or reviews of historical financial information ("ISAE 3000 (Revised)"), issued by the International Auditing and Assurance Standards Board.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion. Our responsibilities under this standard are further described in the Practitioner's responsibilities section of our report.

Our independence and quality management

We have complied with the independence and other ethical requirements of the French Code of Ethics for Statutory Auditors (Code de Déontologie) as well as the provisions set forth in article L.821-28 of the French Commercial Code (Code de Commerce) and the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standard Board for Accountants (IESBA Code), which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Management 1, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Responsibilities for the Identified Sustainability Information

Management of the Company is responsible for:

- The preparation of the Identified Sustainability Information in accordance with the criteria set out in section "IV.A Use of Proceeds" of the 2023 Green Bond Framework, applied as explained in section "Overview of Crédit Agricole Group Green Bond Framework" of the 2024 Green Bond Impact Report (the "Criteria");
- Designing, implementing and maintaining such internal control as management determines is necessary to enable the preparation of the Identified Sustainability Information, in accordance with the Criteria, that is free from material misstatement, whether due to fraud or error; and
- The selection and application of appropriate sustainability reporting methods and making assumptions and estimates that are reasonable in the circumstances, if any.

Practitioner's responsibilities

Our responsibility is to plan and perform the assurance engagement to obtain limited assurance

CREDIT AGRICOLE GROUP**Independent practitioner's limited assurance report on the sustainability information in the Crédit Agricole Group's 2024 Green Bond Impact Report****31 December 2024 - Page 3**

about whether the Identified Sustainability Information is free from material misstatement, whether due to fraud or error, and to issue a limited assurance report that includes our conclusion. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence decisions of users taken on the basis of the Identified Sustainability Information.

As part of a limited assurance engagement in accordance with ISAE 3000 (Revised) we exercise professional judgement and maintain professional scepticism throughout the engagement. We also:

- Determine the suitability in the circumstances of the Company's use of the Criteria as the basis for the preparation of the Identified Sustainability Information.
- Perform risk assessment procedures, including obtaining an understanding of internal control relevant to the engagement, to identify where material misstatements are likely to arise, whether due to fraud or error, but not for the purpose of providing a conclusion on the effectiveness of the Company's internal control.
- Design and perform procedures responsive to where material misstatements are likely to arise in the Identified Sustainability Information. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Summary of the work performed

A limited assurance engagement involves performing procedures to obtain evidence about the Identified Sustainability Information. The procedures in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

The nature, timing and extent of procedures selected depend on professional judgement, including the identification of where material misstatements are likely to arise in the Identified Sustainability Information, whether due to fraud or error.

In conducting our limited assurance engagement, we:

- Considered the Identified Sustainability Information, and through interviews, obtained an understanding of the procedures implemented by the Company to produce the Identified Sustainability Information;
- Obtained, through interviews, an understanding of Crédit Agricole Group 's control environment and the information systems relevant to the production of the Identified Sustainability Information, noting that we did not test the design and operational effectiveness of the information systems and controls relevant to the production of the Identified Sustainability Information;
- Assessed the eligibility of a sample of Eligible Assets with respect to the 2023 Green Bond Framework;
- Performed the necessary reconciliations between the Identified Sustainability

CREDIT AGRICOLE GROUP**Independent practitioner's limited assurance report on the sustainability information in the Crédit Agricole Group's 2024 Green Bond Impact Report****31 December 2024 - Page 4**

Information and the accounting records and verifying that the information is consistent with the data used to prepare the Crédit Agricole Group's consolidated financial statements as at 31 December 2024;

- Assessed the overall consistency of the Identified Sustainability Information in relation to our knowledge of the Crédit Agricole Group.

Neuilly-sur-Seine, 13 October 2025
